

Vanhamel Figure 6 | Publication, reconstruction and WSPRadar

M7AEO (IO82) received by ON4AWM0 and ON4AWM1 | 1,441 same-cycle pairs | Reference correction +1.6 dB

A Publication | Original Figure 6 image

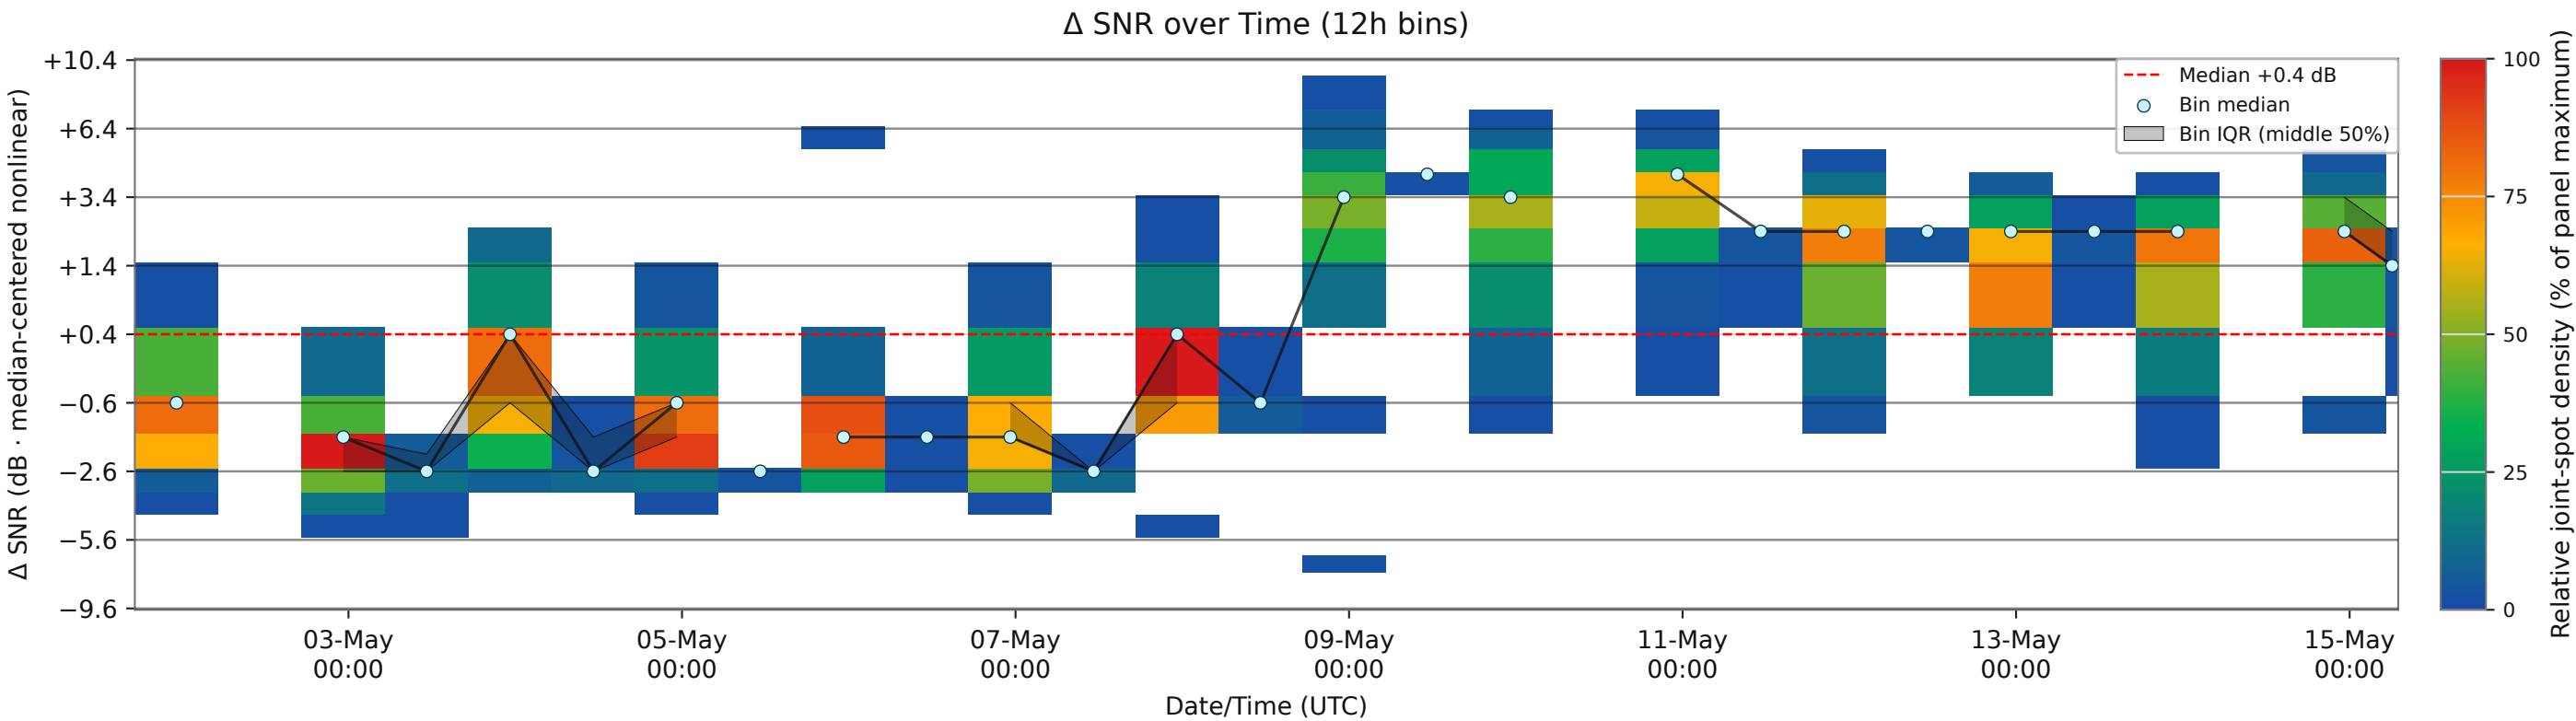

B Reconstruction | WSPRadar paired results at every reception

A/B: identical linear axes; reported-SNR scale for antenna traces. No fitted shift, amplitude scaling or time warp.

C WSPRadar | Selected Station Evidence, white export, 12h bins

C uses elapsed UTC time and WSPRadar's nonlinear median-centered axis; 12h bins retain counts, medians, IQR and tail cells.

The bin grid begins at 01 May 2021 17:15 UTC. Empty bins remain empty. Reception 750 is not an exact published UTC timestamp.
